GALLERY CHAIRS AND AUDITORIUM SEATINGS

design-led performance seating

Your choice of seating will very much depend on the type of events and performances you intend to hold.

Whether you are a conference facility, theatre or corporate auditorium, the layout and seating itself will play a central role in attracting events and revenue potential of your venue.

How the layout is planned will determine the ultimate audience capacity; and future-proofing is critical when looking to maximise income streams.

And with this in mind, our auditorium seating collection features options such as built in cupholders and the integrated Wrimatic™ A3 writing tablet.

As well as the consideration given to capacity and sightlines, we work with you to blend the right aesthetic with ergonomics and comfort. Providing seats that are beautiful, comfortable and functional.

The right space creates the ultimate audience experience. That is why we're so passionate about designing the seating that fills these spaces.

We want to work with you to create a beautiful space that delights your audience and increases customer loyalty.

Attention to detail, work ethic, expertise - you can see it in every one of our chairs. This is what's at the heart of our company.

mission

exceed customer expectations
live by design
inspire a happy team

arctic

The Arctic was developed for Singapore's Universal Studios theme park.

The domed backrest is reminiscent of Grand Caberet and music halls which once dominated the social set of the twenties.

Designed to provide nostalgia and legacy without compromising on modern expectations of comfort and ergonomics.

atlantic

The Atlantic is a chair provding levels of comfort and versatility beyond its compact size.

Ideal for both refurbishments and new projects, the variety of seat centre choices enables clients to maximise seating capacity without compromising on form or function.

Cold cure moulded foam ensures long lasting comfort while the polyurethane armrests will outlast all those in fabric.

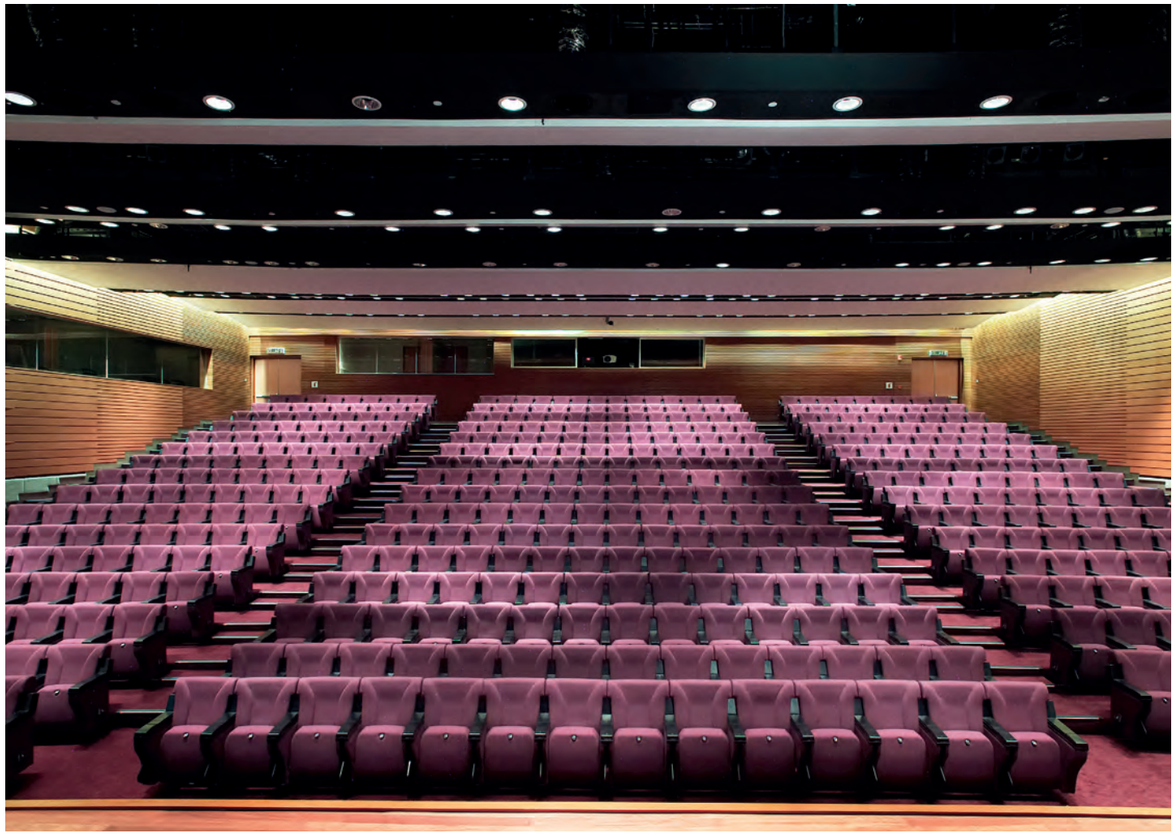

The moulded foam cushions wrap the support springs in an airtight cocoon preventing both noise and corrosion.

Its compact envelope allows for ease of access and egress.
