PADEL

Padel brings together the best of different racket sports. The result is fast, explosive and spectacular play. MONDO closely collaborated with athletes and federation officials to develop the perfect surfaces for this fun sport, which is becoming a true global phenomenon.

EXCITING AND FUN FOR ALL.

WORLD PADEL TOUR

MONDO

OFFICIAL SUPPLIER

MONDO OFFICIAL SUPPLIER OF THE WORLD PADEL TOUR.

MONDO is the Official turf field Supplier of the World Padel Tour circuit since 2012. Thanks to a strict collaboration with the Padel Federation, in the WPD 2017 edition MONDO developed a specific turf system that perfectly meets the needs of the players. Mondoturf's artificial grass for padel courts has also been used for the centre court of the World Championship (Barcelona 2012, Palma 2014, Malaga 2015). MONDO's artificial grass for padel courts was the first type to be approved by the Spanish Padel Federation. In addition, MONDO is a member of the CEIP (the Commission for the Internationalisation of Padel) and the AIPP (the International Association of Padel Producers).

PADEL

STX 90 10 A SUPERCOURT

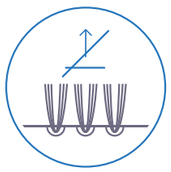

TOP LEVEL PADEL.

Even when padel is played at the highest level, fun is the name of the game. MONDO developed the STX Supercourt system especially for the center court of the World Padel Tour, and to offer sports clubs the same high-performance surface the world's top professionals enjoy.

STX TEXT

A thermo-mechanical treatment of the turf fibres which results in curled filaments.

BACKING WITH POLYURETHANE COATING

During the manufacturing process of Mondoturf layers, fibres are woven on a double-layer polypropylene backing and affixed with a polyurethane application.

STX 90 10 A SUPERCOURT is a cutting-edge artificial turf system composed of STX monofilaments with a semi-concave upright structure and a central spine, and sand infill.

STX SUPERCOURT. THE TURF OF CHAMPIONS.

In 2016, MONDO developed a fiber capable of responding completely to the needs of professional padel. STX SUPERCOURT guarantees consistent angular and vertical bounce on the court, before and after impact with the glass. Because of its texturized structure, the turf requires only a minimum amount of stabilization infill, and the sand stays in place among the fibers without becoming irregularly distributed across the surface.

STX 90 10 A SUPERCOURT

TECHNICAL DETAILS

Yarn Height	10 mm
Yarn Dtex	9.000 dtex
Infill	Sand
Elastic Carpet	-

All Mondoturf carpets are Greenguard and Greenguard Gold certified.

PADEL

STX 90 12 A

STX 90 12 A is a next-generation artificial turf system composed of STX monofilaments with a semi-concave upright structure and a central spine and sand infill.

STX. CONTROLLED BOUNCE FOR UNORDINARY PLAY.

The STX fiber's central spine and upright structure give the turf greater resilience, because fibers recover their original position after contact with the athlete's foot or the ball. Bounces are faster and more consistent, which reduces wear on the ball and minimizes felt damage.

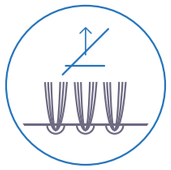

ALWAYS CONTROLLING THE MATCH.

Padel appeals to athletes of all ages and skill levels, which is why it is important for the court to be safe and provide a uniform response.

SATURN MONOFIBRE

A 250-micron thick polyethylene monofilament with a single central rib.

BACKING WITH POLYURETHANE COATING

During the manufacturing process of Mondoturf layers, fibres are woven on a double-layer polypropylene backing and affixed with a polyurethane application.

STX 90 12 A

TECHNICAL DETAILS

Yarn Height	12 mm
Yarn Dtex	9.000 dtex
Infill	Sand
Elastic Carpet	-

All Mondoturf carpets are Greenguard and Greenguard Gold certified.

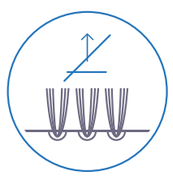

PADEL

NSF 66 12 A

FUN THAT LASTS OVER TIME.

Padel courts can be subjected to intense use - especially if they’re used for doubles, too. With MONDO NSF turf, standing up to heavy use isn’t a problem.

BACKING WITH POLYURETHANE COATING

During the manufacturing process of Mondoturf layers, fibres are woven on a double-layer polypropylene backing and affixed with a polyurethane application.

NSF 66 12 A is a next-generation artificial turf system composed of polypropylene NSF fibrillated filaments and sand infill.

FIBRILLATED POLYPROPYLENE MONDOTURF: OPTIMIZED FIBRILLATION.

MONDO ‘s exclusive progressive fibrillation alignment model includes a thicker cutting sequence and greater cutting length which improves the fiber’s appearance and durability. Compared with traditional fibrillated fibers, Mondoturf fibers in synthetic turf fields maintain optimal friction, resilience, and abrasion resistance longer.
