VOLLEYBALL

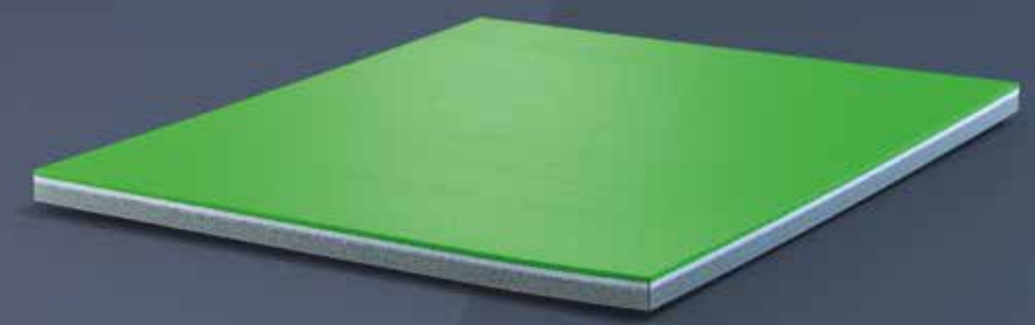

In volleyball, timing means everything. The pass. The set. The block. The spike. Speed, agility and explosive leaping can make the difference between victory and defeat. MONDO indoor surfaces are outstanding for playing volleyball at the highest levels.

GO ALL-OUT IN EVERY SET.

VOLLEYBALL

VINYLSPORT PERFORMANCE

SUPPORTING EVERY SPIKE, BLOCK, AND ATTACK.

With all of the leaping, lunging, and diving in volleyball, competitors need a floor that provides superior shock absorption, enabling them to go all-out without fear of injury.

Vinylsport Performance is a pre-fabricated sports flooring delivered in rolls. It has shock-absorption values greater than 25% (Category P1 according to regulation EN14904), and is designed for easy installation.

SECURITY UNDERFOOT.

Due to a supporting underlayer made of polyurethane foam, Vinylsport Performance guarantees shock absorption greater than 25%, and it can be installed as a loose-laid solution with adhesive tape and weld rods. The embossed, opaque, non-slip finish makes this flooring ideal for all levels of volleyball play. And MONDO offers a wide range of flooring colors, including the FIVB's official colors.

THE ULTIMATE VOLLEYBALL SYSTEM.

Designed for volleyball, Vinylsport Performance is a loose-laid flooring system with a PVC finish. The surface pattern ensures the ideal friction coefficient for players' every movement, as well as minimal abrasiveness for diving and spiking. Vinylsport Performance may be installed with adhesive tape and weld rods, so it doesn't need to be glued to the slab below, which maintains the court's dimensional stability.

VOLLEYBALL

VINYLSPORT HIGH PERFORMANCE

RAISE THE STANDARDS. ELEVATE THE GAME.

Speed, agility, and explosive leaping. Volleyball requires a high-end surface capable of supporting high-performance play. That's Vinylsport High Performance.

Vinylsport High Performance is a pre-fabricated sports flooring, delivered in rolls, with shock-absorption values of more than 35% (Category P2 according to regulation EN14904), making it ideal for high-level competition.

MAXIMUM SAFETY FOR ELEVATED COMPETITION.

Thanks to a supporting underlayment made of polyurethane foam, Vinylsport High Performance guarantees shock absorption greater than 35% for total comfort. The embossed, opaque, non-scratch, and non-slip finish makes the flooring ideal for high-level competition. And MONDO offers a wide range of colors, including FIVB's official colors.

A LOOSE-LAID INSTALLATION SOLUTION FOR VOLLEYBALL.

Designed for volleyball, Vinylsport High Performance flooring has a PVC finish. The surface pattern ensures the ideal friction coefficient for players' every movement, as well as minimal abrasiveness for diving and sliding. Vinylsport High Performance can be installed with adhesive tape, so it doesn't need to be glued to the slab below, which maintains the court's dimensional stability.
